Venture Grants Competition 2019-2020: Call for Proposals

The Transplant Research Foundation of BC (TRF) is excited to announce the 2019-2020 Venture Grants competition call for proposals.

Program Description

Through the Venture Grants program, the Transplant Research Foundation of BC supports innovative projects across British Columbia that have the potential to significantly impact solid organ transplantation. The intent of the Venture Grants competition is to fund new areas of research (e.g., new hypotheses, techniques or ideas) that are in a pilot/feasibility stage, and which will lead to external peer reviewed funding to support the next stages of research.

Eligibility

- Eligible projects include investigator-initiated clinical trials, clinical research, ethics, patient-centered projects, or basic research projects;
- Projects that involve external collaboration are eligible and encouraged;
- An individual can be Principal Investigator on only ONE application per competition;
- Investigators are not eligible to apply for new funding through this competition while holding an existing Venture Grant.
- Investigators who have final project reports outstanding from any past TRF internal grant/award competitions at the application deadline will not be eligible to submit an application to this competition.

Application Deadlines

Initial registration forms to be submitted on or before March 21, 2019. Only selected applicants will be invited to submit a full Venture Grant application. Full applications must be submitted by April 25, 2019. Funding decisions will be made on or before July 8, 2019. Successful applicants will be notified by email.

Funding

Proposals will be considered for a maximum grant from the TRF of \$25,000, renewable on application for extension for up to a total of two years. The TRF will consider proposals for up to \$50,000, when the amount of funds required in excess of \$25,000 are provided by another funding agency and secured by the Applicant prior to the distribution of the TRF grant.
